## VARIANCE

A Variance is a land use approval that is used to obtain approval from relief from specific bulk, dimensional, or performance standards established in Title 19 of the Mercer Island City Code (MICC) when extraordinary circumstances relating to the physical character or configuration of the property exist such that the strict implementation of the development regulations will impose unnecessary hardships on the applicant. An applicant or property owner may request a variance from numeric standards only. Variances cannot be used for numerical or other standards in Chapter 19.07 MICC, Environment.

### REVIEW PROCESS – TYPE IV LAND USE REVIEW

Type IV reviews require discretion and may be actions of broad public interest. Decisions on Type IV reviews are only taken after an open record public hearing. Type IV reviews require a pre-application meeting, letter of complete application, notice of application mailing and posting, a 30-day public comment period, public hearing, notice of decision, and the decision is made by the Hearing Examiner, or in some cases, Ecology.
