

PROTECT THEIR PAWS

Exercising your dog is important, but equally important is caring for their paws on hot days.

Follow the 7 Second Rule

Press your hand against the ground for 7 seconds. If the ground is too hot for your hand, it's too hot for a dog's paws.

AIR	GRASS*	CONCRETE*	ASPHALT*
78°F	77°F	95°F	114°F
85°F	82°F	105°F	130°F
91°F	87°F	125°F	140°F

At **125°F** skin destruction can occur in just 60 seconds.
