Re: 2023 Water System Improvements Project  
Project Design Notification

Dear Island Resident:

Design of the 2023 Water System Improvements Project has begun. The City has contracted with Axis Survey and Mapping to begin design work within Mercer Island neighborhoods starting this week and may be onsite performing work in the ROW and/or easements. **Construction is anticipated to start Spring/Summer of 2023.**

The current project limits for the proposed 2023 Water System Improvements have been divided into three work schedules as follows (refer to back of page).

- Schedule A will replace approximately 3,000 linear feet of undersized 6" cast iron water mains with new 8" ductile iron water mains on portions of 60th and 62nd Avenues in the East Seattle neighborhood.
- Schedule B will replace approximately 2,800 linear feet of undersized 4" and 6" cast iron water mains with new 8" ductile iron water mains near the 7400 block of North Mercer Way and in the 2200 to 2700 blocks of 73rd and 74th Avenues.
- Schedule C will replace approximately 2,300 linear feet of undersized 4" cast iron water mains with new 8" ductile iron water mains on portions of SE 37th Place, SE 41st Street, and SE 42nd Street in the 7600 to 7800 blocks.

The scope of work also includes replacing all fire hydrants, water services, and air/vacuum valve assemblies. In total, approximately 8,000 linear feet of water mains are planned to be replaced. The old water mains and service lines will be abandoned in place and left in the ground.

Please e-mail [george.fletcher@mercerisland.gov](mailto:george.fletcher@mercerisland.gov) or call me at (206) 640-5379 if you have any questions. Thank you.

Sincerely,

George Fletcher  
CIP Project Manager
